Did You Know?

- Over 80% of all homes built before 1978 have lead-based paint in them.
- Each year, over 1,000 children in Erie County are found to have unsafe blood lead levels.
- Children do not have to eat lead paint chips to get lead poisoning.
- Lead exposure can be harmful to the brain and nervous system, causing behavior problems, learning disabilities and lowered intelligence scores.

Learn About...

- The Dangers of Lead Poisoning
- If You Could Have a Lead Paint Problem
- Programs to Conduct Lead Safe Work Practices in Your Property

Featuring: Andy McLellan, President, Environmental Education Associates
